

## Competition entries

The details for competitions Clayesmore SC are entering will be emailed out by the Club Administrator in advance of the entry deadline. Swimmers should speak to their coach about which events they should enter. The entry process for each meet can vary based on the promoter's conditions, however typically it requires the completion of a paper entry form returned to the Club Administrator, who then makes an online group entry for the whole swimming club. The costs of the meets also vary and in each instance the cost per event will be included in the details circulated and the payment method confirmed.

### ASA Number

When you are entering for a competition you will be asked to provide your swimmers ASA number. You can find this number by going to [www.swimmingresults.org/members](http://www.swimmingresults.org/members) and searching under surname.

### Licensed Times

Licensed times are necessary for swimmers to have when entering licensed meets and National, Regional and County Championships. Licensed means that they have been achieved at a licensed meet run under the rules of the ASA (Amateur Swimming Association).

To find your swimmers licensed time for a particular event, you can go to [www.swimmingresults.org](http://www.swimmingresults.org). Go to the section – Individual Best Times and then search under your family surname. You will then get all their latest times and you can also look at historic times.

### Results /Rankings

You can find your swimmers rankings at a National, Regional, County or Club level at [www.swimmingresults.org](http://www.swimmingresults.org). Search under Event Rankings for your swimmer by Surname and then you can filter the results to see their rankings by age, gender, stroke, distance, short course or long course.

### Short Course and Long Course Conversion

TIME CONVERSIONS

Use the form below to select the appropriate conversion, event, and your gender, enter your time and click the appropriate button to carry out the conversion. The 'Factors' button uses conversion factors to convert the time, whereas the 'AGA Tables' button uses ASA equivalent performance tables and the 'Points (British)' uses ASA comparative points tables. These methods are as described in the FAQ.

Conversion:

Event:

Gender:

Time (in Seconds):

Pick your conversion method:

Your time converts to:

You will sometimes need to convert a time to a long course or short course time depending on the requirements of the meet. To do this go onto [www.pullbuoy.co.uk/times](http://www.pullbuoy.co.uk/times) - you will then be able to convert the time. The site asks you to pick a conversion method – use the ASA tables.

### Meet Mobile

A recent development at many swimming competitions has been the ability to access swimmers results through an App rather than wait until the results are physically posted on a noticeboard. The App is called Meet Mobile - you can set up favourites so you can quickly access the results for your swimmer and the events they are in at key meets. There is an annual fee which is currently less than £5.00 per annum.
